

1,000-SEAT THEATRE

Architect's drawing of the entrance, foyer and lobby area. The star design is in the terrazzo entrance shown in the photo at the right.

An arched entranceway, with natural rock as the finishing material distinguishes the Star Theatre. The terrazzo flooring reaching out to the sidewalk, the steel framing for the display cases and doors and recessed dome lights create a simple elegance in the area.

Red and gold carpeting with its custom-designed starburst pattern dominates the decor of the lobby. The starburst idea also is carried out in the light fixtures. Restrooms are at the far end of the lobby, with

one of the two semicircular ramps shown at the left. Decorative louvers and ceiling dome lights complete the treatment. Theatre offices are located in an area between the two ramps.
